

IN THE SPECIFICATION

Please replace the paragraphs on page 5, line 10-line 15 with the following replacement paragraph:

To increase the cell surface expression of the hybrid protein, it is possible to mutate or delete sequences known to increase trafficking to the cell plasma membrane such as endoplasmic reticulum (ER) retention signal(s) and/or to insert sequences known to increase trafficking to the cell plasma membrane such as export signals; RKR retention signals may be mutated to RAA, and/or FCYENE (SEQ ID NO: 25) export signal may be inserted in the hybrid protein.
